

MASTER DRESSING — VINCENT VAN DUYSSEN 2017

1—
16

Following the success of Gliss Master, Vincent Van Duysen has designed Master Dressing, a walk-in wardrobe system that completes the wide range of nighttime systems offered by Molteni&C. Master Dressing perfectly complements the Gliss Master wardrobes thanks to the use of coordinated internal fittings and aesthetic finishes, thereby providing functional and impactful walk-in closets.

FEATURES

Walk-in closet system that makes it possible to design customized compositions with linear and corner solutions. A system of wall-mounted racks provides support for suspended fittings (shelves, clothes rails, drawer units and other accessories) that can be positioned at regular intervals of 32 mm. Master Dressing always uses wall-mounted panels available in different finishes.

MODULARITY

Linear modules

Standard compositions are built in the same heights as Gliss Master (H 2919, 2631, 2439, 2343), and widths are decided based on the 798/962 mm module plus 42 mm at the beginning and end of the composition (if the composition is set between two walls).

Modules can be reduced in both height and width.

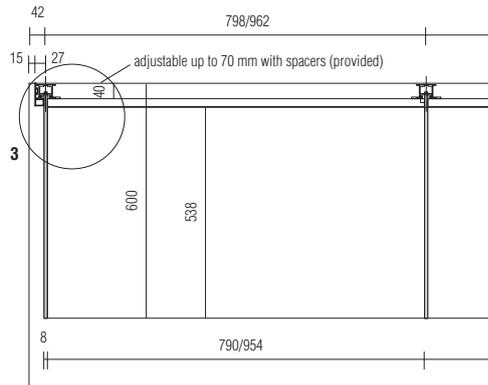

It is possible to reduce the depth of the following components up to a maximum of -160 mm (from 538 mm to 378 mm):

- bases
- wood shelves th 40
- glass and Eco Skin shelves th 30
- shelf fixing bracket

max width 270 mm

Single module

- Melamine shelf th 40
- Lacquered shelf th 40
- Wood shelf th 40
- Glass shelf th 30
- Eco Skin shelf with profile th 30

Shelves (th 40) in the finishes melamine, lacquer and wood are also available in full lengths for 2 or 3 modules.

All shelves can be reduced in width for custom compartments.

MODULARITY

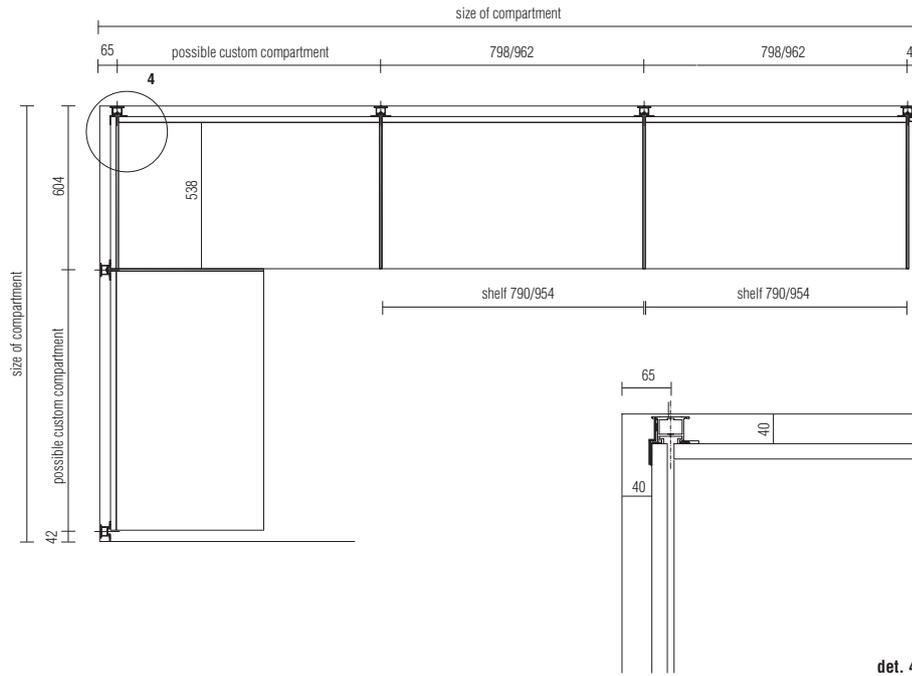

Corner modules

With Master Dressing, it is possible to create L-shaped or C-shaped corner compositions. To design these compositions, in addition to the centre distance of the standard module (798/962 mm) and the starting distance (42 mm), it is necessary to consider the measurements of the corner (65 and 604 mm) as shown in the examples below.

This example shows the different ways of using the fittings and the possibility of mounting structures on the wall.

Example 2

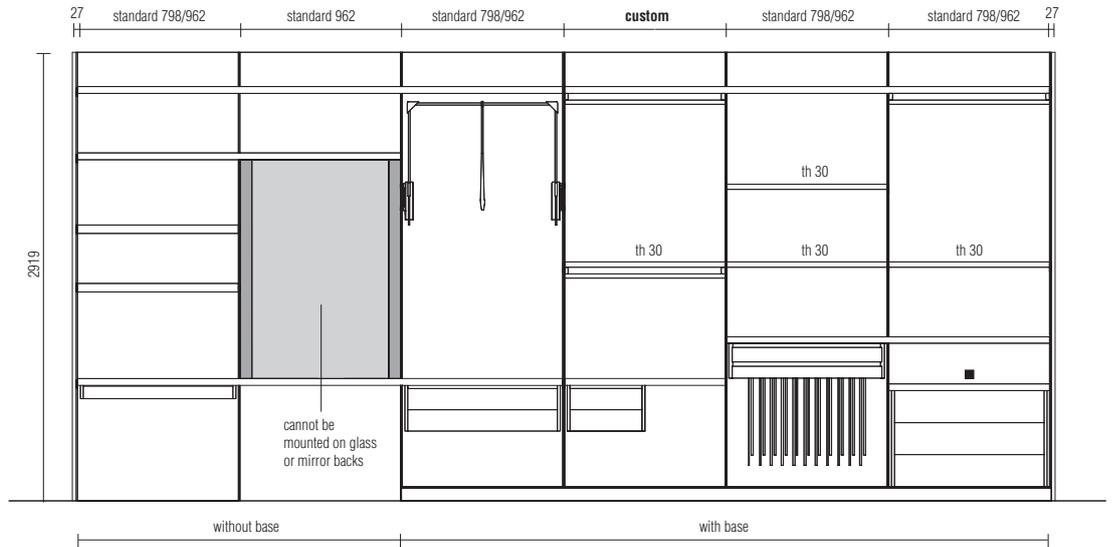

A simple illustration of how to determine the number of brackets required for the composition.

Example 1 - fittings

Shelves th 30 (glass and Eco Skin) are max. 1 module wide (954 mm).
Shelves th 40 (wood) are available in a width of max 3 modules (2878 mm).

■ = the drawer unit set on the floor or on the base does not have fixing brackets and is not aligned with the intervals of the shelves

Example 2 - brackets

It is advisable to avoid placing shelves th 30 right next to shelves th 40, especially if they are supporting wall-mounted drawer units

○ = bracket to count

Drawer units

Wood shelves th 40 and Eco Skin shelves th 30 can receive the wall-mounted drawer unit structures. In this case, it is advisable to not place them side by side because the drawer units would not be aligned.

Floor-standing drawer units or on bases, cannot be aligned with closet shelves.

Structures can receive several drawers or trays in compliance with the modularity indicated with the dots ●. Drawers and trays always have HOLD handle.

LIGHTING

LED Lighting

Shelves in wood, Eco Skin and glass can be outfitted with LED lighting. The wiring system is compliant with European safety standards. To allow the closet to be lit simply and quickly, the fixing profiles are wired with an electrified wire strip (see example on p.12) and the brackets are fitted with contacts.

Notes

When placing the order, the client must indicate on the drawing which shelf or shelves are to be fitted with the lighting bars. Bars are always aligned with shelf width.
